

Analytics Consultant (5+ years' experience) - Sydney

With our specialist analytics services in demand, we have new opportunities available for consultants with an analytics background to support projects across a range of business lines including aviation, insurance, marketing, health and forensics.

Part owned by Qantas Loyalty, we are not your typical consultancy offering a dynamic, innovative and collaborative environment with people that are truly passionate about what they do.

We pride ourselves in our ability to help clients make strategic decisions which add true value to their business.

Our analytics practice offers client-focused solutions to both corporate and government clients, using the latest statistics, machine learning and data science research and techniques. Our offering is broad covering a range of projects such as personalised marketing, insurance pricing, resource optimisation, people analytics and other services that provide our clients with insights to improve performance.

A broad analytics focused role, offering a mix of hands on solution development along with strategic client engagement.

We are looking for someone who wants to become a part of our posse – to mentor and train junior team members, contribute to business activities, and be excited to innovate and strengthen future business growth.

At Taylor Fry we like to get our hands dirty, so you can expect to work closely with senior stakeholders and contribute to key project decisions. You will need to be a confident operator as you will act as an internal advisor interpreting and analysing complex technical data across various streams of work on both small and large projects.

Exposure to clients is important at every stage of a consultant's career, therefore you can expect to interact with clients regularly and be involved in business development efforts, participating in tenders and proposals.

Maintaining an open, cohesive culture is paramount.

Our people love rolling up their sleeves to immerse themselves in the technical detail; being technical is part of our DNA. We foster a culture of high performance yet balance this with a genuine care for employees, nurturing their interests and supporting their growth and development.

Taking an active interest in our people and their careers, we promote work practices that support well-being, mental wellness and work/life balance.

About us

We are a leading independent firm, providing analytical and actuarial advice to government and business, we develop deep understanding of our clients through building long-term relationships and providing personalised service from highly experienced analysts and actuaries. We are at the forefront of developing innovative and world-class solutions for the actuarial and analytical challenges faced by our clients, solving problems using data.

How to apply

Send your CV along with a cover letter and a copy of your academic transcript to careers@taylorfry.com.au to the attention of the HR Manager.

Suitable candidates should possess the following skills and experience:

- At least 5 years' experience in an analytics-focussed role, either in a consulting or corporate environment
- A background in actuarial (beneficial but not a must have)
- Experience in scripting languages such as SAS, R or Python
- Experience in predictive modelling, statistics and/or machine learning
- Ability to interpret and analyse complex technical data with high attention to detail
- Some experience leading, training and mentoring junior team members
- As Taylor Fry is a consultancy, it is imperative that candidates are strong communicators who have good interpersonal skills and are confident liaising with and presenting to clients and diverse stakeholder audiences.
