

JOIN TAYLOR FRY 2020

Who are we?

TAYLOR FRY is an analytics and actuarial consulting firm with offices in Sydney, Melbourne and Wellington. Our work spans traditional general insurance to cutting-edge data analytics, backed by our strong focus on research and development.

A few years ago, Qantas liked the analytics work we did for them so much, they snapped up a 51% share in the company.

Why work with us?

- **You won't be bored.** This is a chance to sink your teeth into high-end analytics projects, as well as traditional actuarial work.
- **You'll learn stuff.** Our grads work elbow to elbow with senior staff.
- **You might even have fun.** There are loads of young people, hardly anyone wears a suit, and we hang back on Friday nights for pizza and boardgames.

What are we looking for?

- **Students with 12-18 months to go in their degree.** So you can start as a graduate in February or July 2020 in Sydney, Melbourne or Wellington.
- **Quantitative degrees.** We've hired actuaries, mathematicians, statisticians, engineers, biologists, physicists and economists.
- **An impressive transcript.** With a willingness to learn, contribute and grow.

We're happy to receive applicants who don't yet have their permanent residency.

How to apply
